

STANDING ORDER NO. Traff. Mgt./07/2022

FUNCTIONING OF PUBLIC INTERFACE UNIT (PIU) IN TRAFFIC POLICE HEADQUARTERS

1. INTRODUCTION

Public Interface Unit (PIU) has been made operational at the Delhi Traffic Police Headquarters, Dev Prakash Shastri Marg, near PUSA, New Delhi to act as an interface for prompt dissemination of traffic related information to road users, spread road safety awareness, redress the complaints of public on traffic matters and enhance public participation in traffic management. It is a tool for participation of general public in traffic management and for ensuring ease of transportation of motorists and other road users.

2. OBJECTIVE

The objectives of the Public Interface Unit are:-

- a) To establish a two- way communication between Delhi Traffic Police and the public for dissemination of information by issuing traffic advisories/alerts in advance regarding any emergent issue(s) and possible blockades on roads and also dissemination of information about possible diversion(s) and alternate routes.
- b) To look into the suggestions received from the general public regarding traffic management.
- c) To share information with other agencies for providing better traffic management on Delhi roads.
- d) To use social media platforms for spreading road safety awareness among road users.
- e) To receive and redress complaints of traffic congestion, improper parking, vehicle breakdowns, non functional traffic signals, complaints against TSR/Taxi drivers for overcharging,

refusal, misbehavior; and, also to invite suggestions from the public for improvement of traffic situation.

- f) To receive inputs regarding problem in discharge of traffic owing to construction/repair work, stranded/breakdown vehicle, uprooting of trees, water logging, dysfunctional signal timing, accidents, events, etc. from the field functionaries or members of the community/general public and dissemination of the same for the general public.
- g) To disseminate information to general public through traffic advisories/alerts in advance regarding any emergent issue and possible blockades on roads and also dissemination of information about possible diversion and alternate routes.
- h) To sensitize/inform Traffic Police personnel about causes, problems, solutions and responses for better traffic management.

3. SOURCE OF INFORMATION

- a) Telephone calls made by general public on traffic Helpline Nos. 1095/011-25844444.
- b) Inputs received from field functionaries.
- c) Electronic inputs received through Traffic Police Facebook, Twitter & WhatsApp handles.
- d) Input from Function Branch/Traffic, which prepares annual calendar of events affecting condition of traffic, schedules and information on VVIP routes (not supposed to be disclosed but the Public Interface Unit can advise the commuters to take alternate routes to reach their destination during these periods).
- e) Traffic advisories, press releases, advertisements related to traffic, notifications etc.
- f) Road safety Cell/Traffic, Photo Section/Traffic through road safety awareness programmes.

4. INDIA 87 (WIRELESS SUB. CONTROL ROOM):-

India-87 (Sub. Control Room) works in close coordination with PIU. Any information concerning non-functioning of traffic

signals/blinkers, matters related to civic road maintenance agencies requiring their immediate attention and information which is to be collected from field functionaries for uploading on Facebook, Twitter, etc., shall be collected by India 87 on wireless and all such updated information shall be furnished to Public Interface Unit for further dissemination to the general public. India 87 shall also make optimum use of Hot Lines connected with MCD/NDMC and use all available networks on wireless to collect such information. The functions and responsibilities of the India 87 shall be as follows:-

- a) To communicate with officers/offices of Traffic Police and other Delhi Police units/districts for effective traffic management.
- b) To communicate with officers of traffic and other units/districts deployed on VIP duty, rallies, religious processions and other special arrangements.
- c) To guide the field staff on diversion plans, parking plans, location of cranes, location of Disaster Management Vehicles, bus terminals, contingency routes, no entry restrictions, etc. The Sub-Control Room shall have complete knowledge
- d) To forward calls received through Traffic Helpline/ Facebook/ WhatsApp to the field staff for immediate remedy of traffic problems such as traffic jams, improper parking, road accidents, area problems, faulty Signals, etc. and take feedback.
- e) To communicate the complaint number of signal maintaining agency for rectifying the faulty signal to the concerned TI.
- f) India 87 shall be manned round the clock by Communication staff. India 87 shall work in close co-ordination with Public Interface Unit.

5. WORK DISTRIBUTION OF PUBLIC INTERFACE UNIT:

It will work round the clock in four shifts. The functioning of all the wings of Public Interface Unit will be as under:-

- A. FACEBOOK
- B. TWITTER
- C. WHATSAPP
- D. TRAFFIC HELPLINE
- E. HOT LINE

- F. SIGNAL FAULT MONITORING SYSTEM (SFMS)
- G. VMS (VARIABLE MESSAGE SIGN BOARD)
- H. MONITORING OF LIVE TRAFFIC ON IMPORTANT TRAVEL CORRIDORS THROUGH GOOGLE TRAFFIC.

A. Facebook & Twitter

- (1) **These social media applications will facilitate the general public by giving the following traffic updates:-**

Information regarding problem in discharge of traffic owing to (i) construction/repair work (ii) stranded vehicles (iii) uprooting of trees (iv) water logging (v) accidents (vi) events those affect traffic (vii) traffic advisories/alerts regarding any emergent issue (viii) heavy traffic blockades, etc., will be communicated through the social media along with the information regarding diversion and alternate routes. Traffic alerts/advisories are also shared through Tatpar App. They will also provide information regarding removal of these obstructions, traffic advertisements, road safety rules, etc., which will be regularly uploaded on the Facebook and the Twitter page. TI/PIU will be authorized to change the password of the Facebook and the Twitter account. All Addl. CsP-T/(Ranges)/DCsP-Traffic (Districts)/ ACsP-Traffic, TIs (Circles)/ Traffic Control Room/ INDIA-87 will ensure that necessary information regarding traffic updates are provided to the Facebook /Twitter staff so that public can be informed well in time.

- (2) **Receiving complaints/suggestions (related to the traffic) from the public and forwarding it to the concerned officer for appropriate action.**

Complaints related to traffic problems in the area, traffic jams, photographs/videos of traffic violations, suggestions, etc., (uploaded by the user on the Twitter handle or on the main page of Facebook) shall be immediately attended to by the Public Interface Unit by calling reports from the concerned field functionaries/branches of Traffic Headquarters in the following manner as per the nature of the complaint:-

- (a) Complaints which require immediate intervention/relief like traffic jams, improper parking, etc., shall be forwarded/brought to the notice of Inspr./Incharge of the Traffic Circle through I-87 immediately and it shall be the duty of Inspr./ Incharge of the Traffic Circle to ensure immediate prompt action into the complaint and update India-87 about the action taken and the outcome.

- (b) Complaints related to traffic violations (as mentioned in the list at **Annexure-I**) having videos/photos of the vehicle (in which registration no. of the vehicle registered in Delhi and offence mentioned by the complainant is visible) along with details like date, time and place (which must be in Delhi) shall be forwarded to the Computer Branch for issuing notices u/s 133 MV Act, 1988 against the violators. Notices issued against the vehicles prosecuted on the basis of photographs/videos shall be uploaded on the link of users on Facebook page. If the complainants send photos/videos without mentioning the violation, but the violation is visible to the Facebook/Twitter staff detailed on duty, then notice shall be issued for visible violations.
- (c) Complaints related to traffic violations by police personnel of local police as well as traffic police while using official vehicles shall also be forwarded to concerned Addl CsP (Traffic Ranges)/DCsP (Districts) for taking necessary action, in addition to the Computer Branch.
- (d) Complaints related to area problems like regular illegal parking, daily traffic jam due to improper parking, suggestions related to management of traffic and functioning of signal, etc., shall be forwarded to the respective Addl. CsP/Ranges via email on a daily basis.
- (e) Complaints received on the Twitter handle of Delhi Traffic Police will also be forwarded to the Twitter handles of concerned Addl. CsP-Traffic/Ranges for real time information and corrective action to update the individual on their own. It shall be the duty of Addl. CsP/Traffic Ranges to depute staff for regular checking of e-mails sent by PIU so as to ensure proper and prompt action into the complaints and action taken report be sent back to the PIU office within a week to maintain the proper record of the complaints.
- (f) Complaints related to dysfunctional traffic signals shall be forwarded to the concerned signal maintaining agency via SFMS. After getting a feedback from the concerned Signal maintaining agency and Traffic Circle, SFMS staff shall inform the Facebook/ Twitter Staff.
- (g) Complaints pertaining to civic agencies like potholes on road, branches of trees/foliage/advertisement boards/banners/or other impediments obstructing the visibility of signals, falling

of tress on road, water logging, etc., shall be forwarded to civic agencies along with the ACP/TI of the concerned area.

- (h) Complainants/Users posting complaints pertaining to local police or any other department shall be requested to make their complaint to the concerned by providing them the address/phone number/ e-mail id of the concerned department, if available.
- (i) The desk officer who is handling the Facebook and Twitter handle of Delhi Traffic Police should adhere to the following general instructions:-
- In case full details are not given in any complaint/Photograph/video, staff shall ask the complainant to repost the complaint/ photograph/ video with full details.
 - Staff operating Facebook/Twitter will not indulge in unnecessary chat with the complainant/user.
 - If a complainant uploads the same complaint repeatedly (within a prescribed time period), staff is authorized to delete all extra posts except one so as to reduce the load on the Facebook page and the Twitter handle.
 - All the photos and videos posted by the complainant shall be deleted after two months.
 - All the photos and videos posted by the PIU shall also be deleted after two months.
 - Complainants/users posting obscene or pornographic photos/videos/matters shall be banned immediately and entire matter shall be noted down in the Banned User Register. A notesheet for approval of his ban shall also be forwarded to the senior officers.
 - If a complainant attempts to post on behalf of Delhi Traffic Police, legal action may be initiated after warning him.

A register shall be maintained on the prescribed proforma **(Annexure-II)** in which details of the complaints and their final disposal shall be entered. The same shall also be entered in a Database through dedicated software programme devised by Insp. Computer/ Traffic.

Diaries of complaints and photographs/videos received on the Facebook page and the Twitter handle will be prepared on a fortnightly and monthly basis as per the proforma attached at **Annexure-III (complaints), IV, V & VI** (photograph/video) and shall be put up through TI /PIU to ACP-T (HQ-I), DCP-T (HQ-I), Jt. CsP/Traffic-I, Spl. CP/TMD for perusal.

Officer Authorized for updation of comments/ records

The desk officer deployed on the Facebook page and the Twitter handle of the Delhi Traffic Police is authorized to update the comments/ records.

Authority to change Password

TI/PIU is authorized to change the password of the Facebook page and the Twitter handle of Delhi Traffic Police.

A list of Guidelines/Code of Conduct /Information for the public for using Social media of Delhi Traffic Police are enclosed at **Annexure 1.**

The Facebook and Twitter desks will work in co-ordination with other sections of the Public Interface Unit.

B. Twitter:-

Complaints received on Twitter handle of Delhi Traffic Police will also be forwarded to the Twitter handles of concerned Addl. CsP-Traffic/Ranges, DCsP-Traffic/Districts for real time information, to take corrective action and to update the individual/complainant on their own.

In addition, Twitter accounts must be used by the respective Addl. CsP-Traffic/Ranges, DCsP (Traffic)/Districts to highlights the good work, special drives, etc., conducted by them on a regular basis.

C. WhatsApp :-

Delhi Traffic Police also uses WhatsApp services on mobile No. **8750871493** to receive complaints/photographs/videos from the public regarding any traffic violation, unauthorized parking, overcharging/ refusal/ misbehaviour by auto/taxi drivers, dysfunctional traffic signals or any other issues related to traffic. Complaints received on WhatsApp will be forwarded to the concerned ACP-Traffic through official e-mail for redressal. ACP/Traffic shall be directed to depute staff for regular checking of e-mail sent by PIU so that the same can be communicated to the concerned TI and appropriate action could be taken in time on the complaint. Since the contact number of the complainant will be available in the e-mail, TI concerned will also inform him/her

about the action taken. Each ACP/Traffic of the concerned District will also communicate the action taken report to the PIU for record maintenance.

Complaints received on WhatsApp shall be immediately attended by Public Interface Unit by calling reports from the concerned field functionaries/Traffic Headquarter Branches in the following manner as per the nature of the complaint:-

- i. Complaints which require immediate intervention/relief like traffic jams, improper parking, etc., will be immediately forwarded/brought to the notice of the Inspr./ Incharge of the Traffic Circle through India-87 and it shall be the duty of the concerned Inspr./ Incharge of the Traffic Circle to ensure immediate action into the complaints and update India-87 about the action taken and the outcome.
- ii. Complaints related to traffic violations (as mentioned in list at Annexure-I) having videos/photos of the vehicle (in which registration no. of the vehicle registered in Delhi and offence mentioned by the complainant is visible) along with details like date, time and place (it must be in Delhi) shall be forwarded to the Computer Branch via email for issuing notices u/s 133 MV Act, 1988 against the violators. If the complainants send photos/videos without mentioning the violation, but the violation is visible to the WhatsApp staff detailed on duty, then notice shall be issued for visible violations.
- iii. I/C computer shall ensure that notices are issued against all the violators daily and notice numbers be provided to WhatsApp Staff by the next day, so as to maintain the records.
- iv. Complaints related to problems like regular illegal parking, daily traffic jam due to improper parking, suggestions related to management of traffic, problem in functioning of signal, etc., shall be forwarded to the concerned ACP/Traffic through official email for redressal.
- v. Complaints related to defective traffic signals shall be forwarded to the concerned signal maintaining agency via SFMS. A feedback shall be taken from SFMS for maintaining the records.
- vi. Complaints pertaining to civic agencies like potholes on road, branches of trees covering signals, falling of trees on road, water logging, etc., shall be forwarded to civic agencies via

Hotlines/ helpline nos./Police Control Room as well as to the concerned Traffic Inspector for prompt action, via I-87.

General instructions to be followed by the officer handling the WhatsApp accounts of the Delhi Traffic Police:-

- In case full details are not given in any complaint/photo, staff shall ask the complainant to give full details.
- All the actionable messages/complaints received on WhatsApp shall be forwarded to the WhatsApp, email (concerned Addl. CsP-T/Ranges, DCsP-T/Districts) and to the concerned Traffic ACsP, Branches via email so that entry can be made in the WhatsApp database.
- If the same complaint is received for the second time, it shall be forwarded to the Addl. CsP-T/Ranges, DCsP/Traffic (Districts) through e-mail.
- All the messages /complaints/queries, etc., shall be deleted from mobile /Tablet after entry in the register and the database.
- Complainant/user sending obscene or porn photo/video/matter shall be blocked immediately and entire matter shall be noted down in the register along with his phone number.
- Similarly, groups shall also be blocked and entry shall be made in the register.

Complainants/Users sending complaints pertaining to local police or any other department shall be requested to make their complaint to the concerned agency by providing them the address/phone number /email id of the concerned department, if available.

A register shall be maintained on the prescribed proforma (**Annexure-VII**) in which details of the complaints and their final disposal shall be entered. The same shall also be entered in a Database through dedicated programmes devised by Insp. Computer/ Traffic. Diaries of complaints received on WhatsApp shall be prepared on daily/ fortnightly and monthly basis as per proforma attached at **Annexure VIII** and shall be put up through TI/PIU to ACP-T(HQ-I), DCP-Traffic/(HQ-I), Jt.CsP/Traffic-I, Spl. CP/Traffic Management Division for perusal and directions to the

respective DCsP-Traffic/Ranges for taking remedial/ necessary action into the pending complaints.

Officer Authorized for updation of comments/ records

Whosoever, is deployed on WhatsApp desk duty, is authorized to update the comments / records. The WhatsApp desk will work in co-ordination with other sections of the Public Interface Unit.

D. Traffic Helpline:-

Traffic Helpline No. 1095/011-25844444 has hunting facility on ten lines. Complaints/suggestions received from the public through this helpline shall be noted down in a register by the Helpline staff and forwarded to the concerned branches/agencies/area traffic police officers for taking necessary action. The same shall also be entered in a database through a software programme devised by Inspr. Comp./Traffic for analysis of the data on a fortnightly basis.

Information regarding traffic jam or any other information which requires immediate intervention/relief shall be immediately passed through Wireless (India - 87) to the concerned area traffic police officers. Matters related to the civic agencies shall be sent to the concerned agency through Hot Line and Police Control Room. Complaints related to defective light signals shall be forwarded to signal fault monitoring agency. Complaints related to overcharging, refusal, misbehavior by TSR/Taxi drivers shall be sent to Computer Centre on a prescribed proforma for issuing Notices.

The functions and responsibilities of the Helpline staff shall be as follows:

- (a) To be polite and courteous with the complainants/callers.
- (b) To make all possible efforts to help callers.
- (c) To collect all the information regarding current traffic situation, traffic advisories, traffic arrangements, traffic alerts, topography of Delhi, jurisdiction of different traffic circles, Road Safety rules, traffic offences and their Penal Sections, etc., so that queries from the public can be answered and immediate relief / alternative route can be provided to the callers.
- (d) To receive calls and initiate necessary action for immediate relief by communicating the same to the concerned officer.

- (e) To enter the contents of the complaint/call in computer database for analyzing the information collected and send analysis diaries to senior officers for further directions.
- (f) The complaints relating to traffic violations by motorists shall be forwarded to Computer Centre for initiating prosecution against them. In case there is an urgent need to intercept the persons violating the traffic rules, a message shall be flashed through I-87 to the field staff deployed in the particular area for intercepting and prosecuting the violator.
- (g) Complaints relating to traffic jams, accidents or any other problem which requires immediate intervention shall be conveyed to the concerned TI/Circle through I-87.
- (h) To inform the complainant about action taken on his/her complaint.
- (i) Supervisory officers shall also be informed of the complaint that requires immediate attention.
- (j) Suggestions made on traffic helpline shall be sent in the prescribed proforma to the concerned branch e.g. suggestion on traffic engineering may be sent to TE Branch, those on road safety education to Road Safety Cell, matters involving legal issue shall be sent to Legal Cell and matters related to area problem shall also be sent to the concerned Addl. CsP-T/Ranges, DCsP-Traffic/Districts.

It shall be the duty of Addl. CsP-T/Ranges, DCsP/Traffic Districts to depute staff for regular checking of helpline complaints sent by PIU so as to ensure proper and prompt action into the complaints and action taken report be sent back to the PIU office within a week, so that complainant can be intimated.

- A list of tasks that need to be performed while attending the calls is attached at **Annexure- IX**.
- A list of tasks that need to be performed while taking over the charge is attached at **Annexure-X**.

Officer Authorized for attending calls

Whosoever, is deployed on Helpline desk duty, is authorized to attend to calls. The Helpline desk will work in co-ordination with other sections of the Public Interface Unit.

A register shall be maintained on the prescribed proforma (**Annexure-XI**) in which the details of the complaints and their final disposal shall be entered. Diaries of complaints received on helpline shall be prepared on fortnightly and monthly basis as per proforma attached at **Annexure-XII** and shall be put up through TI /PIU to

ACP-T(HQ-I), DCP-T(HQ-I), JT.CP-Traffic-I, SPL. CP/TMD for perusal and directions to the Addl. CsP-T/Ranges, DCsP-T/Districts for taking remedial/ necessary action into the pending complaints.

E. HOT LINE:-

Two Hot Lines are available with Public Interface Unit. Messages/information relating to Municipal Corporations of Delhi and New Delhi Municipal Council such as water logging, uprooting of trees, bad condition of roads, etc., shall be sent to the concerned road maintenance agency by the Public Interface Unit.

F. SIGNAL FAULT MONITORING SYSTEM:-

Any information/complaint received with regard to dysfunctional traffic signals/blinkers, from the public or traffic police officers, is passed to the signal maintaining agency online (through computer software) or through separate wireless communication network (as provided by the signal maintaining agency), to direct the technicians for immediate repair of the traffic signals/blinkers and to monitor the complaints relating to faulty traffic signals/blinkers. The functions and responsibilities of the Desk shall be as follows: -

- a. To register complaints relating to faulty traffic signals/blinkers received from traffic officers or general public through I-87 or helpline, Facebook, WhatsApp and Mobile Application respectively in the register as well as in Excel Sheet (devised by Signal Cell).
- b. If complaint is received from the TI/Circles, then SFMS (Signal Fault Maintenance Staff) staff shall communicate the complaint number to the concerned TI through India-87 soon after getting the complaint number from the signal maintaining agency.
- c. To communicate regarding the complaint of faulty signal to the concerned signal maintenance agency through wireless set or online, through software provided by the Signal Maintaining Agency.
- d. To take feedback from the Concerned TI or from the office of the TI, about the repair of the faulty signal, if signal maintaining agency reports that signal has been rectified.
- e. To prepare diary of complaints received and rectified on daily basis and send it to the Signal cell to monitor complaints

relating to traffic signals/blinkers and their rectification) and to the senior officers for perusal via email.

A register in the prescribed proforma (**Annexure-XIII**) shall be maintained. Diaries of complaints received shall be prepared on daily basis as per proforma attached at **Annexure- XIV** and shall be put up through TI /PIU to ACP-T/HQ-I, DCP-T(HQ-I), JT.CP-Traffic-I, SPL. CP/TMD for perusal and directions to the Addl. CSP-T/Ranges and DCP-Traffic/Districts for taking remedial/necessary action into the pending complaints.

Officer Authorized for communication with signal maintaining agency

Whosoever, is deployed on SFMS desk duty, is authorized to communicate about the faulty signals to the signal maintaining agency.

SFMS shall work in close co-ordination with other desks of the Public Interface Unit.

G. VARIABLE MESSAGE SIGNBOARDS (VMS):-

Variable Message Signboards (VMS) have been installed at fifty locations in Delhi. These VMS have been installed to guide motorists, pedestrians and other road users by displaying information about traffic situation, road response and route diversions if any, so that motorists are informed of the diversions and can commute safely to avoid areas of congestion and related traffic situations. The messages displayed will be based on the field reporting from the Traffic Inspectors of the Circles.

The VMS will also display educative and informative message on road safety whenever they are not in use for operational issues. These messages will educate and inform public about traffic rules, safe driving habits and driving discipline.

The VMS control room shall operate under the PIU Branch of Traffic Police with an I/C VMS who will take inputs from the field officers, Control Room, Facebook, Twitter and other interfaces of the Traffic Unit. Insp. PIU will compile the messages accordingly for uploading based on prioritization and requirement.

All the VMS have been codified and GPS tagged with 3G based control room connectivity. VMS codification list is at **Annexure XV**. Similarly, the Standard Educative messages have also been codified

and placed at **Annexure XVI**. The list will be maintained and upgraded by the Control Room, TIs and traffic officers from time to time as required.

The locations of the VMS and the carriageway directions will be available in the Control Room and with the Circle offices. Messages will be numbered based on uniform templates at **Annexure XVII** to be used by all as far as possible for guidance. If any message is to be displayed on a particular VMS, the message shall be passed to India-87. The message should be specific and clearly state the specified number of VMS on which it is to be displayed. (For example if a message of road repair work ahead is to be displayed on VMS of Ashram Chowk to Bhogal, then the short message should display message 29 on LNC 05). To ensure best usage of the VMS, the TIs and other traffic staff should know the placement of VMS in their circles and those in other parts of Delhi to send the most appropriate message affecting a particular area and any incident impeding or creating a traffic situation. In order to have seamless information flow of messages, the following procedure shall be adopted:-

Traffic Inspectors/Circles

1. The Traffic Inspectors will keep with them and in their office the Map, VMS code list and Message Templates at all times. Clear and accurate information should be relayed to the Control Room about the message to be displayed.
2. When the purpose of a particular message is served, the Control Room shall be informed promptly to discontinue the message. It shall be the duty of concerned TI to ensure that incorrect or delayed messages do not continue to run on VMS.
3. Traffic Inspectors should also undertake a study of their area regarding the use of particular VMS for specific safety message, i.e., if a VMS is on a route to a School, then during school opening and closing hours, appropriate road safety messages may be displayed. Similarly, VMS near Hospitals may be used for displaying messages of anti-honking and directions to maintain the sanctity of the silence zone.
4. Every day, the concerned TIs will ensure that VMS are checked at 09.00 AM, 2:00 PM and 7:00 PM and provide report of VMS maintenance through Control Room with respect to the functioning of the VMS, VMS LEDs and any other issue related to VMS. These reports shall be conveyed at the time of

checking and shall form part of the daily report which is sent to senior officers as a VMS fault Diary.

5. Currently, on an average there are one /two VMS per circle. The numbers may go up in the future. Therefore, VMS AMC teams may be assigned the job of monitoring the operations and maintenance of the VMS and optimal use should be made of the team providing maintenance of the VMS.

Traffic Inspector/PIU (Public Interface Unit)

1. TI/PIU shall ensure that staff deployed at the VMS Control Room is appropriately trained before being assigned to the VMS control room. The Facebook and VMS staff shall be suitably rotated to expand the skill pool and maintain continuity of Operations during leave and staff transfers.
2. The VMS shall operate 24 X 7 in three shifts under the PIU. Adequate deployment shall be ensured in VMS control room.
3. M/s Envoys or concerned firms may be asked to train staff through PIU. The Operations Manual shall guide and clearly explain the Menu driven operations of the VMS.
4. No message shall be authorized to be displayed on the VMS without the approval of TI/PIU as per approved functional and display format. Direct communication with VMS control room may be avoided, unless there is an emergency, which should be logged in the VMS register.
5. VMS messages for specific situations and specific circles should be carefully drafted and should be compatible with Facebook information.
6. The Technology of VMS and its software has a Self Fault Log and report generation mechanism. A register shall be maintained in a suitable format to keep a record of the faults and repairs for the VMS by I/C VMS/PIU which are to be checked every week by ACP/TE and everyday by Inspr/PIU to review VMS performance.

I/C VMS Control Room

1. I/C VMS control room shall not be below the rank of an Inspr./SI and will be responsible for day to day operations of the VMS.

2. A well bound copy of the contract and the Operational Manual should be available with I/C VMS Control Room. Permanent records like the coded list along with the description of the VMS shall be kept ready. There will also be a map having the positions marked for each VMS along with photographs.
 3. A copy of the map shall be kept neatly marked and pasted on the wall at a prominent place in the control room.
 4. History sheets of all the VMS shall be maintained separately at the PIU by the I/C VMS Control Room. The History Sheets shall contain information about the VMS on its location, routes, repair, response, and observation of AMC issues as per the contract.
1. Repair and maintenance bills shall be cleared only after receipt of the verification report in the control room. All entries related to VMS shall be made in the history sheet. (format of History Sheet is at **Annexure XVIII**)
 2. I/C VMS control room shall ensure that messages are rotated with appropriate duration and stay time on each VMS. A daily summary report shall be prepared individually for all VMS as to how many VMS were functional and how many VMS were out of order and for what duration. The faults related to LED bulbs of each VMS will also be maintained of each VMS in the History Sheet.
 3. A message should be displayed on the VMS only after it is carefully coded and the input is obtained from the field unit.

The VMS is an important public interface and should be used judiciously to achieve the objectives of safe and efficient commuting with well informed traffic situation updates for commuters on the move.

All officers shall brief and sensitize their staff to follow the above mentioned instructions for optimum utilization of VMS boards installed in their respective areas. All concerned Addl. CsP-Traffic/Ranges, DCsP/T/Districts, ACsP/T and TI/Circles shall closely monitor the functioning of the VMS boards installed in their respective areas on daily basis. They will also ensure that information is displayed in close coordination with VMS control room set up at PIU, Traffic Headquarters, Todapur.

H. **Monitoring of Live Traffic on important travel corridors through Google Traffic.**

Traffic snarls are being experienced on travel corridors of Delhi especially during morning and evening peak hours. The only quantifiable measurement of traffic congestion on corridors is depicted on Google Platform which shows the traffic condition on real time basis on the images captured through Satellites. Google applications work by analyzing the GPS determined locations transmitted on Google by a large number of mobile phone users.

Google provides this service free of cost till 25000 hits daily from single internet connection. Delhi Traffic Police is started making use of the Google Platform to know the traffic conditions especially during morning/evening peak hours, besides other occasions, involving traffic congestion due to festivals, major events, religious processions and other important traffic arrangements.

The congestion monitoring on the 28 corridors of category 'A' shall be undertaken through the use of Google Traffic **(Copy enclosed at annexure XIX)**. To use this service, screen shots of these 28 corridors shall be shared by Public Interface Unit (PIU) of Delhi Traffic Police on the WhatsApp group which has already been created by PIU specifically for Traffic Inspectors of the Circles and other senior traffic officers.

Computer Center and Public Interface Unit (PIU) of Delhi Traffic Police shall map these 28 congested corridors during morning and evening peak hours. Detailed staff will convey the messages on WhatsApp to the concerned Traffic Inspectors of the Circles by sending the screen shots obtained through Google Traffic for their information and ensuring necessary action for facilitating the commuters to move faster to reach their destination in time by providing faster discharge of traffic on these corridors. The screen shots of each selected corridor shall be sent to the concerned TI through WhatsApp, 6 times in a day, in case there is congestion on the corridor. In case no congestion is noticed on the congested corridor through Google Traffic, no information shall be forwarded to the concerned TI through WhatsApp.

The success of the better regulation on these corridors shall also be measured when the concerned traffic official is able to reduce congestion from these corridors by ensuring measures like action against obstructive/improper parking, closure of cuts during peak hours on the corridor, motor cycle patrolling for better and efficient traffic regulation, removal of stranded motor vehicles

through cranes etc. Computer Center /Traffic in close coordination with PIU shall furnish necessary periodic reports to the senior traffic officers in this respect.

Google Maps shall be utilized to define route congestion according to Delhi Traffic Police advisories issued from time to time relating to special events, important traffic arrangements involving traffic diversion etc. and suggest alternative routes to the commuters by avoiding the likely congested routes due to the closures and diversions on that particular day and specified timings. For this, Computer Centre Traffic, PIU, Mapping Section and Function Branch Traffic shall work in close coordination by informing Google teams at Headquarter, Todapur well in advance to plan and modify their software as per their need. The data in this respect should be mailed to Google Team along with Traffic Advisories, Map, details of affected roads etc.

Addl.CsP/Traffic/Ranges and DCsP/Traffic (Districts) shall be the nodal officers to collect and furnish necessary information and data to Computer Center/PIU Traffic one week before the traffic arrangements are to be made for special events in their respective areas so that Google Team can be informed well in time to take necessary action for informing the general public through Google Traffic Maps.

All officers shall brief and sensitize the staff working under their operational control accordingly to implement the above mentioned procedure in true letter and spirit so that Delhi Traffic Police can make maximum and optimal use of Google Traffic Maps for facilitating the general public during their journey on Delhi Roads.

6. OTHER DUTIES:

- i. Jurisdiction map of Traffic Unit shall be available in Public Interface Unit.
- ii. Any information requiring attention of senior officers shall be brought to the notice of the senior officers by TI/ Public Interface Unit.
- iii. Close liaison shall be maintained with Traffic Control Room at Vikas Minar for proper dissemination of information.
- iv. TI/Public Interface Unit shall regularly brief the staff regarding all important issues as well as pending issues along with advisories and alerts for necessary follow up action.

- v. TI/Public Interface Unit shall also ensure preparation and submission of fortnightly diaries to senior officers as well as supervise the working and maintain necessary records at the Public Interface Unit.
- vi. The Public Interface Unit shall also have the list of all important telephone numbers of various agencies and their officers/heads, involved in the traffic management.
- vii. The Public Interface Unit shall function round the clock for which sufficient number of staff shall be deployed.

7. SELECTION AND TRAINING OF STAFF

Staff having basic knowledge of computer and having good communication skills with command over Hindi and English shall be preferred to be posted in PIU. TI/PIU shall identify Staff to be posted in PIU normally for a period of 1 year and willing staff shall be kept in Core Group.

8. BACK UP

Backup of Facebook, Twitter, WhatsApp, Helpline databases will be taken in separate hard disks on fortnightly basis. Audio Record of telephone calls received on Traffic Helpline will be kept for one month. Data base and other records of Facebook, Twitter, WhatsApp, Signal Fault Monitoring System and Traffic Helpline will be kept for two years.

9. RECORDS TO BE MAINTAINED

The records will be maintained in Public Interface Unit as per the annexure attached with the S.O. Registers shall be maintained on the prescribed proforma in which details of the complaints and their final disposal shall be entered. The same shall also be entered in a Database through dedicated programmes devised by Insp. Computer/ Traffic.

10. SUPERVISION

The Public Interface Unit shall be supervised by Inspector PIU under the close supervision of ACP/T/HQ-I. DCP/T-HQ-I will be responsible for supervising the overall functioning of PIU. All important issues concerning the functioning of PIU will be put before DCP/T-HQ-I, Jt. CP/Traffic-I and Spl. CP/Traffic Management Division.

11. SUPERSESSION CLAUSE

This Standing Order supersedes the previous Standing Order No. 347/2020 issued vide PHQ's No.151-300/Record Branch/PHQ dated 24.01.2020.

12. DISCLAIMER

It is made clear that this Standing Order is exclusively for internal smooth functioning of Police Department.

(RAKESH ASTHANA)
COMMISSIONER OF POLICE:
DELHI.

Annexure - I

Guidelines /code of conduct /Information for the public for using Social Media of Delhi Traffic Police

1. Photographs / videos showing any kind of traffic violation should be uploaded with details i.e.; date, time, place of violation and name of violation with clearly visible registration no. of the vehicle.
2. Action shall be taken only on the complaints related to the traffic problems, traffic violations and against traffic staff, so only such complaints should be posted.
3. If DTP asks any user to repost his/ her complaint with some extra information/ detail, the user should repost fresh complaint with the requisite information. If user mentions details under same previous post, it will go unnoticed and action will not be taken on the post as it is not feasible to watch the previous post every time.
4. If user posts his complaint /query inside the posts uploaded by DTP (traffic advisory /traffic alerts/ advertisement etc), action will not be taken as it is not feasible to watch the previous post every time. So, users will post all such things on main page of DTP Facebook.
5. List of offences for which vehicles can be prosecuted on the basis of photographs/videos is under:-

SL.NO	VIOLATION	SECTIONS	REMARKS
1	JUMPING RED LIGHT	U/S -184 MVA	VIDEO

- MVA stands for Motor Vehicles Act 1989.
 - DMVR stand for Delhi Motor Vehicles Rules 1993.
 - CMVR stand for the Central Motor Vehicles Rule 1989.
6. While posting complaints against traffic police personnel, users have to give all details of the incidence with his contact no./address and e-mail ID so that enquiry officer can contact the complainant and get all the information required during the enquiry. Anonymous/ vague complaints shall not be entertained.
 7. A user shall be blocked/ banned immediately if he uses abusive language or posts obscene photographs/videos/materials etc.
 8. A user shall be banned / blocked after warning under the following conditions:
 - a) Uploading or sharing views/ photos /videos taken from any other person's Facebook page/you tube etc;.
 - b) Posting same photo/video for prosecution by changing date, time and place of incidence.
 - c) Posting false complaints.
 - d) Posting news paper clippings.
 - e) Posting individual's views other than traffic concerns.
 - f) Posting advertisements of the products/services.
 - g) Posting thought of the Day.
